

# "47" All Signs Point To Success

PS 347 - The American Sign Language & English Lower School

## Challenging Minds Through Math

"47" The American Sign Language and English Lower School (PS 347) implemented "The Math Challenge" for administration, staff and students as a tool to engage all participants in mathematics in an exciting and fun way. This individual/group challenge recognized the participants' areas of strength in using an approach or strategy to solve mathematical problems. This activity is an important tool for critical and engaging learning. All participants may not arrive at the same answer in the same way, however the journey in solving is more important than the destination of an answer. This is showcased for all to see the mathematical brains of our willing participants. We congratulate those who took on the challenge and look forward to the next mathematical problem!
