

## Supporting English Language Learners

The River School has developed a unique enrichment program to support our youngest English language learners titled *BRICK- Building Responsible Independent Caring Kids*. The *BRICK* after school program focuses on developing English language skills while building character. Through various speaking and listening activities, interactive read alouds and cooperative games, students strengthen their communication skills while learning the qualities of good citizenship. To support parent engagement, this program includes three family workshops. The River School is proud of our *BRICK* students!
